

Aerial Work Platforms

Aerial Work Platforms - There are a lot of accessories meant for lift trucks that can be utilized in order to help expand the functionality of your lift truck and allow you to lift objects, handle materials with out difficulty or to accomplish clean-up tasks.

Lots of the attachments are particularly designed so as to fit on the blades themselves. Blade extensions for instance, are used if you need a lot more blade length, that increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are one more type utilized when moving rolled material in order to make sure it does not roll off of the traditional flat blades.

Examples of lifting accessories include pivoting and telescoping crane or boom attachments. They can come in several different styles and are normally designed for moving poles, metal bars, lumber and other types of bulky stuff. Additional accessories such as different kinds of hooks and hook plates are obtainable to be able to pick up stuff using a chain or sling. Magnetic lifters and slab lifters are other stuff which can be utilized with hook attachments. Slab lifters are specialized accessories which are used for carrying a variety of materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that connect to your forklift so as to make moving rolls of carpet easier. The attachment hooks onto the forklift's forks and has a pole that goes through the center of the carpet roll.

There are many types of lift truck attachment used for facility maintenance such as snow forks. These industrial forks could be connected to front end loaders and used for transferring materials like for example mulch, snow as well as dirt. Other popular cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the lift truck forks connect onto for sweeping big spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for example. Sweepers have widths up to 60 inches and this surface area makes clean up simple and quick.

A material spreader is another forklift accessory which is normally used at facilities. These spreaders are handy for a variety of applications like for instance spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting attachment that many companies utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models obtainable that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location utilizing the forklift. Larger platform models have extra space for employees in order to bring tools and other necessary objects meant for the job. Normally work platforms are constructed of steel or ploy material.
