

## Barrel Clamps

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic accessory is actually used on forklifts to squeeze objects which you wish to move using the forklift. Usually, they are utilized to barrels, handle kegs, and paper rolls, along with a few barrel clamp designs being able to rotate the cargo. For example, the revolving function enables the individual operating the forklift to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
